TULUM, THE PLACE TO INVEST

The best destination in terms of growth, this magical city is among the best places in the world for real estate investments.

Tulum is the new home for citizens from all over the world, which has driven the increase in demand and appreciation of real estate.

The daily average income per unit and occupancy levels have reached the highest historical levels, thanks to the migratory effect due to the arrival of digital nomads.

Returns on investment (ROI) are in (14% per year) average, and projections suggest this situation will not change soon.
